

WHAT A CLEANER!

COD: CHE-CLEANER
CHE-CLEANER-10

DESCRIPTION

Multi-surface cleaner for developer tanks. Available in 0.75L spray bottle or 2 x 5L canisters.

PLEASE NOTE: DO NOT apply on aluminium. Does not remove sulphur or silver stains.

SAFETY INSTRUCTIONS

For detailed safety and handling instructions refer to MSDS or contact BELLINI FOTO S.r.l. by e-mail: info@bellinifoto.it or by telephone +39 075 985 174. Handle with care and follow safety and handling instructions. Wear gloves and use safety goggles; keep out of reach of children.

USAGE INSTRUCTIONS

Method 1

Spray concentrate onto surface. Leave for 1-2 mins. Rinse with water.

Method 2

Dilute 4 parts water with 1 part cleaner concentrate. Apply onto tank surface and allow to act for 30-40mins. Use with warm water (max. 40°C) for optimal results.

Method 3

Dilute 9 parts water with 1 part cleaner concentrate. Apply onto tank surface and allow to act overnight (max 12 hrs). Use with warm water (max 40°C) for optimal results.

PROCEDURE

- 1) Empty developer tank, remove chemical filter and rinse tank.
- 2) Do not remove racks. Apply cleaner solution in either concentrate or diluted form.
- 3) Run the machine. Switch off machine after cleaning. Drain used cleaner solution and dispose of in adherence with local water and environmental regulations.
- 4) Fill developer tank with water. Run machine for a few minutes to rinse tank.
- 5) Switch off machine. Empty tank.
- 6) Repeat rinse process 1-2 times to ensure no product residue remains in tank.
